

Windchill 12: Upgrade Services

Switch to the latest version of Windchill

PTC Windchill is a **Connected Product Lifecycle Management** system that enables organizations to embark on their **Digital Transformation Journey**. Its newest version – 12.0 - introduces many features including gathering information from smart connected products and machines, driving digital design, or manufacturing efficiency. Windchill was recognized for its ability to enhance collaboration; its incorporation of innovative technologies such as IoT, Augmented Reality, analytics, and artificial intelligence.

Make sure your organization is taking **full advantage** of **Connected PLM in its Digital Transformation** and **upgrade to Windchill 12.0 today**. To go through this process as seamlessly as possible, you can cooperate with **TT PSC**.

Benefits of Windchill 12

Better collaboration, closed-loop quality, and concurrent manufacturing

Implement Closed-Loop Quality

ALM and PLM integration delivers proof of traceability for finding and fixing problems early. This new capability is delivered through tight OSLC integration with the PTC toolchain (Windchill RV&S and Modeler) and third-party requirements management tools (e.g. IBM Doors NG).

Support Concurrent Engineering with the Factory

BOM transformation tools enable manufacturing engineers to quickly view and reconcile upstream changes to downstream manufacturing and plant-specific BOMs.

Rapidly Develop Role- and Task-Based Apps

ThingWorx Navigate 9.0 enables customers to build their own unique custom apps, leveraging a rapid app development environment with reusable components. Experience 8x faster time-to-value when building a new custom App with Windchill ecosystem.

Windchill Extension Center

Windchill Extension Center is a platform that includes additions to the Windchill system, providing small functionalities that, until now, were often manually designed for the client's needs.

Value of Windchill upgrade with TT PSC

- ✓ **End-to-end service:** turnkey solution, minimizing or entirely removing any impact on your business.
- ✓ **The highest quality of service,** addressing even the most difficult technical challenges.
- ✓ **Unmatched expertise and experience – dozens of delivered upgrades** – guarantees you are in good hands.
- ✓ Following (and defining) **best practices for upgrade processes** of PTC products.
- ✓ Possibility to implement or migrate Windchill to the **AWS, Azure, Google, Oracle Cloud.**

Our upgrades

Our upgrade services are designed to get your solution up and running quickly and flexibly, so you can get back to transforming your business. Don't let your concerns keep you from experiencing the benefits of Windchill 12. Transition Technologies PSC offers a complete portfolio of services to Make Your **Windchill 12** Upgrade Successful.
