Project Management in Jira+BigPicture environment

## The goal and advantages of the training

With **BigPicture** you can manage your projects using agile, cascading, mixed methods or on a larger scale in accordance with SAFe. The user has several templates and dashboards to choose from so that they can quickly plan tasks for their team and track progress.

### The training allows the attendee to learn about:

- ✓ Advanced functionalities related to project portfolio management (PMO)
- ✓ A tool adapted to various project management methodologies (Waterfall, Agile, SAFe or mixed)
- ✓ The multi-level project portfolio hierarchy
- ✓ The Gantt module: a clear presentation of the workflow within the whole project
- ✓ Automation mechanisms that support creating work schedules, for example
- ✓ The Scope module: quick filters, advanced aggregation, WBS
- ✓ The Roadmap module: estimating business value, goal setting, monitoring and evaluating actions taken

## Certified trainer
